

Summer 2022

End of First Grade Summer Math Suggestions:

During summer, we are not requiring specific Math worksheets or workbooks. However, there are some recommendations that we are making to keep your child's skills sharp and ready for 2nd grade.

Please be sure to spend time this summer on the following:

- Math facts- all children should be able to add and subtract to 20 WITHOUT a number-line, using fingers, or with the use of manipulatives.
 - Practice using flash cards
 - Ask your child facts in the car- $7+6$ or $15-8$ etc...
 - Make up mini quizzes and time your child
- Telling time to hour and half hour on analog clocks
- Use riddles and stories to work on problem solving and brainteasers
- 2 digit addition and subtraction- DO NOT REGROUP

If you find it helpful to have a specific worksheet or book for practice, I suggest you look into the "Summer Bridge Activities" books that can usually be found at Barnes and Noble or online. Any work you do with your child will benefit them in the long run and make the transition to grade 2 much easier.

**If you only have time to focus on 1 math topic---PRACTICE
MATH ADDITION AND SUBTRACTION FACTS SO THEY BECOME
AUTOMATIC FOR YOUR CHILD—**

**It is suggested you spend 35 minutes a week on memorizing
and drilling math facts to 20**
